YOUR BEST PV SUPPLIER

Ideal choice for large scale ground installation

Shingled cells use flexible adhesives instead of metal alloys to achieve interconnections between the cells, which has better flexibility

Selected encapsulating material and stringent production process control ensure the product is highly PID resistant and snail trails free

Lower LID due to lower oxygen and carbon content

Special cell process ensures great performance under low irradiance conditions

Provides higher module efficiency under low irradiance conditions, and achieves greater installation capacity in a limited space.
